

New Health Discovery Astonishes Doctors and Researchers!

Ancient Formula Yields Secrets of a ...

Blood Sugar *BREAKTHROUGH!*

Natural Discovery Stabilizes Blood Sugar, Proven To

Prevent and Eliminate

Diabetes

Heart Disease

Depression

Stroke

High Blood Pressure

Blindness

Fatigue

Kidney Disease

Nervous System Disease

Dental Disease

Digestive Problems

**So Powerful and Effective, It's Patented!
(U.S. Patent No. 5,886,029)**

YOU May Be One of the 8 Million Americans With UNDIAGNOSED Blood Sugar Imbalance -- Causing You Serious Health Problems Now or Soon!

New Patented Formula ...

Reduce Your Chance of Death and Disease By Up To **76%**

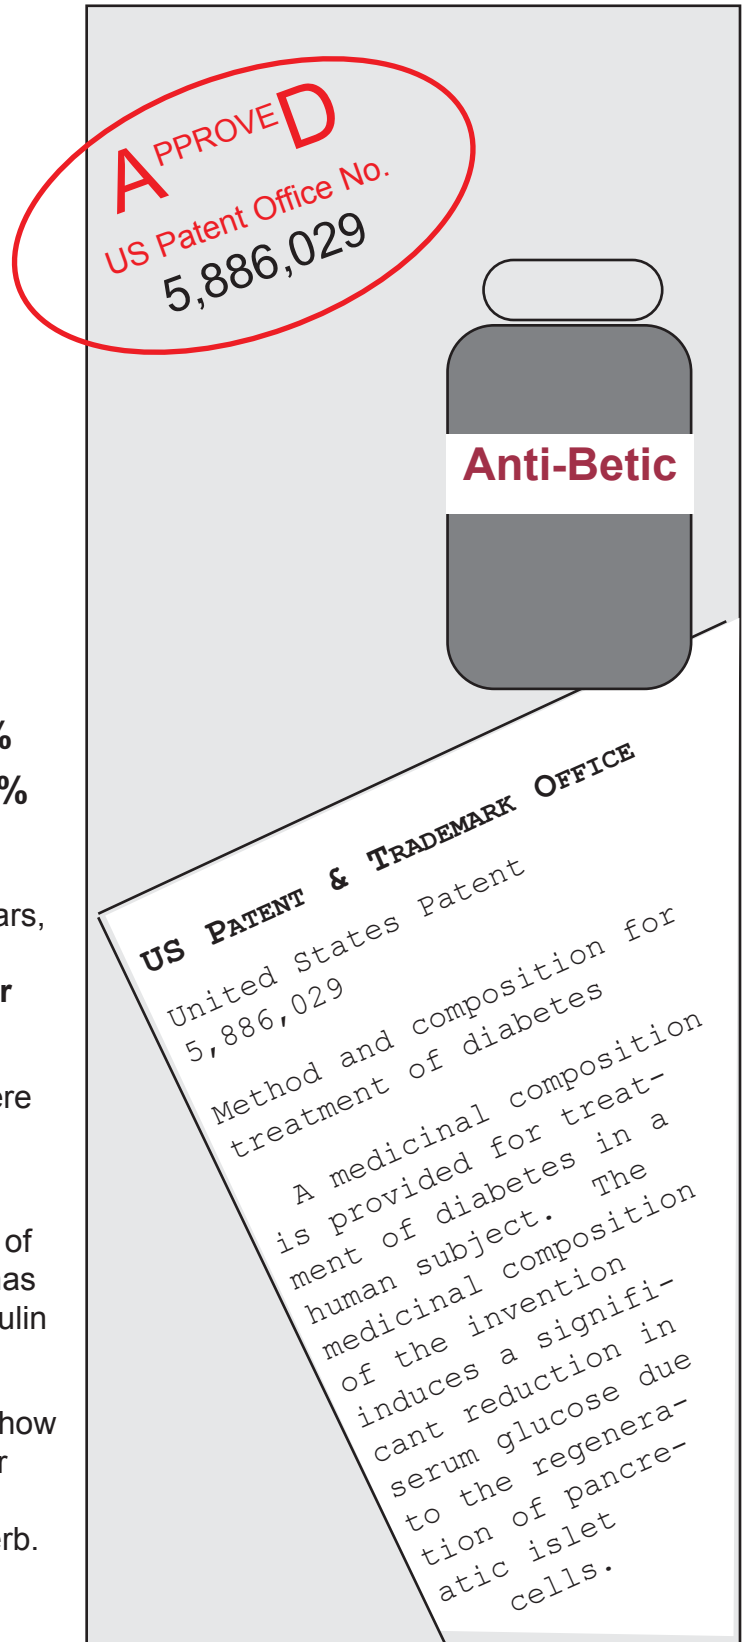

- ◆ Nerve Disease **DOWN 60%**
- ◆ Kidney Disease **DOWN 50%**
- ◆ Vision Problems **DOWN 76%**
- ◆ Heart Disease **DOWN 35%**

After dozens of scientific studies over many years, the results could not be more plain: **Keeping Your Blood Sugar In Balance Will Slash Your Risk Of Death and Disease.**

The problem has been that until recently, there was no safe, proven, natural way to keep your blood sugar in line.

Now all that has changed with the discovery of an ancient formula that is so effective, it even has enabled some diabetics to throw away their insulin syringes.

The pages that follow will help you discover how to change your life and live longer and healthier with this patented natural healer which is 100% safe to take with any prescription, vitamin or herb.

About The Author, Dr. XXX

Breakthrough Discovery of Ancient Formula Lets You

End and Prevent Blood Sugar Problems!

photo of happy older couple

LIVE HEALTHIER -- Reverse the Damage Done by Years of Blood Sugar Imbalances

LIVE LONGER -- Regenerate Pancreatic Cells and Restore Natural Insulin Production

From deep within the jungles of India, delicately wrapped in a non-descript palm leaf bundle, researchers have recently made a discovery that has turned the medical world upside down.

Inside this bundle was a Sanskrit manuscript containing an ancient natural healing formulation perfected centuries ago by India's Ayurvedic vaids (doctors).

Based on centuries of experience with natural herbs and roots, the formula these doctors painstakingly recorded was a natural cure for an illness which had killed and affected many of their people. This disease was known to them as "honey urine", but today we know the problems as blood sugar imbalance and diabetes.

This ancient formula has proven so effective in treating blood sugar imbalances and diabetes, that it's been granted a status almost unheard of for an all-natural formulation: a U.S. Patent (No. 5,886,029) for a "method and com-

position for treatment of diabetes."

And in India, which has the largest concentration of diabetics in the world -- over 100 million people -- this safe, natural herbal formulation has literally changed thousands of lives. So much so that the No.1 News Magazine, *The Week*, recently hailed the formula on its cover as the "CURE FOR DIABETES."

You May Have Double The Risk Of Death And Not Even Know It

In this report you will learn all about this life-changing herbal formulation. You will see the numerous studies conducted throughout the world that prove its effectiveness. And you will discover how to get and use this formula to prevent and eliminate blood sugar imbalance and the debilitating diseases it causes.

But the most important thing you need to know is that if you are age 50 or older, this patented natural formula can extend and

improve your life dramatically.

Here's why:

- ◆ Studies have found your risk of death DOUBLES if your blood sugar is imbalanced.
- ◆ You may be one of over 8 million Americans who are walking around like ticking time-bombs with undiagnosed blood sugar imbalances.

Think about what this means.

TWICE as likely to miss out on your grandchildren and great-grandchildren.

TWICE as likely to leave your spouse all alone.

TWICE as likely to miss

"This [progressively rising risk of death] makes it critically important that doctors identify people with abnormal blood glucose levels..."

-- Frederick L. Brancati, MD, Johns Hopkins University

out on the best years of your life.

... and you do not even know it!

And here's a sobering thought. These same studies show that even if you don't die from a blood sugar imbalance, your risk of being debilitated by serious problems like heart disease is four times as high.

You Shouldn't Ignore The Silent Killer That Affects 16 Million Americans

I can understand that, especially if you've been healthy most of your life, you may wonder why you should start worrying about your blood sugar now. The answer is simple.

According to the National Diabetes Information Clearinghouse, over 16 million Americans have diabetes -- most of them aged age 65 and older. Chances are better than 1 in 5 that you will have some form of diabetes as you

approach age 60.

And the likelihood that you have a non-diabetes blood sugar imbalance is even greater. In fact, more than half of all blood sugar imbalances are not diagnosed until it's too late.

Here's Why Imbalanced Blood Sugar Can Kill You

There are two known causes of blood sugar problems, both of which revolve around your pancreas. Your pancreas is critical to keeping your blood sugar balanced because it produces and regulates the hormone insulin. Without insulin, your body cannot use blood sugar.

Inside the pancreas are groups of specialized cells called Islets of Langerhans. These cells monitor blood sugar levels and signal the pancreas to either increase or decrease the amount of insulin secreted into your blood to keep things level.

One blood sugar problem

occurs when your pancreas does not produce enough insulin to metabolize the sugar in your blood. The second problem occurs when your body produces so much insulin that your cells develop a resistance to it and cannot process the blood sugar any more.

Either way, the result is a dangerously high concentration of sugar building up in your blood. As the sugar level increases, it transforms from vital food to dangerous poison. And since it's in your blood, this poison spreads throughout your whole body causing damage and disease.

The most commonly known blood sugar disorder is diabetes. Diabetes is actually a group of chronic diseases characterized by high blood sugar levels. This results from defects in your body's ability to properly metabolize carbohydrate, fat and protein.

The classic signs of diabetes are frequent urination, excessive thirst, and excessive appetite. Diabetes often leads to severely debilitating or fatal complications such as blindness, kidney disease, heart disease and amputations.

That's what makes diabetes the sixth leading cause of death in the United States, claiming more than 300,000 lives each year.

If You Think You're Safe Because You Don't Have Diabetes... You Better Think Again

Chances are, when you read the words "blood sugar", you immediately thought of "Diabetes." But most people who suffer the effects of blood sugar disorders do not

diagram of how the pancreas works

have diabetes.

When Dr. Frederick Brancati, MD, associate professor of medicine and epidemiology at the Johns Hopkins University, took the podium at the latest meeting of the American Diabetes Association's 59th Annual Scientific Sessions you could hear a pin drop. He had just completed a landmark study on blood sugar imbalances, and his findings shocked even this group of diabetes experts.

Dr. Brancati's study showed conclusively that the potentially fatal risks and complications of high blood sugar levels begin long before people develop diabetes. Here is what this means to you:

Even if you do not have diabetes, any imbalances in your blood sugar increase your risk of death significantly.

Dr. Brancati studied 3,246 adults who participated in the National Health and Nutrition Examination Survey and its Mortality Study between 1976 and 1992. When he compared death rates with blood sugar levels, he found a stunning correlation.

Compared to those with normal levels, those with even mildly elevated blood sugar levels had a 42% greater risk of death. And those with diagnosed diabetes had a 211% increased risk.

Dr. Brancati summed it up this way, "There is a progressively rising risk of death as glucose tolerance worsens ... This makes it critically important that doctors identify people with abnormal blood glucose levels, especially those with undiagnosed diabetes."

The bottom line is that simply having slightly higher than normal blood sugar can **increase your chance of death by 42%!**

Are You Prepared To Be Very Sick The Rest of Your Life?

Fortunately most people with diabetes and blood sugar imbalances don't just suddenly keel over and die. But that doesn't mean you can sit back, relax and take your chances. Instead of dropping dead, you can end up spending your life battling debilitating diseases.

Studies show that your chances of being affected by, and suffering with, serious health problems is tripled, quadrupled and more when you have blood sugar imbalances. For example ...

- ✓ **300% More Heart Disease** -- After age 45, you are three times more likely to have significant cardiovascular disease than those with normal blood sugar.
- ✓ **500% More Strokes** -- You are 5 times more likely to suffer strokes when you have a blood sugar imbalance than if you do not.
- ✓ **428% More High Blood Pressure** -- Your blood sugar imbalance makes you over 4 times more likely to have high blood pressure, which further increases your risk of heart attack and stroke.
- ✓ **400% More Blindness** -- You are 4 times more likely to become blind due to retinopathy when your blood sugar is imbalanced.
- ✓ **2,000% More Kidney Disease** -- With imbalanced

10-Year Study Proves Keeping Your Blood Sugar In Balance Reduces Your Risk of Death

The importance of keeping your blood sugar levels under control is not a new idea. More than 60 years ago, Dr. Elliott P. Johnson first proposed that diabetic complications could be reduced and even eliminated by keeping blood sugar levels normalized. Many case studies seemed to confirm Dr. Johnson's theory, but a scientific study was required to make conclusive proof.

Starting in 1983 the National Institute of Diabetes and Digestive and Kidney Diseases instituted a landmark study on the benefits of controlling blood sugar. It was called the Diabetes Control and Complications Trial (DCCT).

After studying 1,441 people with diabetes for ten years, the astonishing results proved once and for all the importance of keeping your blood sugar in balance. Risk of eye disease -- **CUT 76%**. Risk of nerve damage -- **CUT 60%**. Risk of kidney disease -- **CUT 50%**. Risk of cardiovascular disease -- **CUT 35%**.

Nothing is proven more effective at normalizing blood sugar than the patented, all-natural **Anti-Betic** formula. This study proves that you can not only live better and healthier ... but live longer!

blood sugar you are 20 times more likely to develop end stage renal disease than if your blood sugar is normal.

✓ **310% More Nervous System Impairment** -- 65% of those with imbalanced blood sugar will be affected by nerve impairment. Symptoms may include loss of bowel or bladder control, digestion problems, muscle weakness, sexual problems, pain or tingling in the extremities. Keeping blood sugar balanced reduces this risk by 69%.

✓ **ü00% More Infections** -- You are up to 7 times more likely to develop a serious infection with unbalanced blood sugar, compared to people with normal blood sugar. These infections can affect you from head to toe, including, gum disease, skin infections, tuberculosis, pneumonia, bladder and kidney infections, vaginal yeast infections, incisional infections after surgery and foot infections that may lead to

foot or leg amputation.

✓ **400% More Mental Decline** -- Your risk of dementia quadruples when you have a blood sugar problem. And researchers from Johns Hopkins studying 1,455 persons with sugar problems found that cognitive impairment afflicted these people a full 10 years earlier and with greater frequency than those without sugar problems.

✓ **Additional Problems** caused by blood sugar imbalances include: gastrointestinal problems, depression and carpal tunnel syndrome and more.

If you are suffering from any of these problems now, imbalanced blood sugar could be at the root of your problem.

The good news is that when you get your blood sugar back in balance, you can prevent and end many of these problems. But there is one major difficulty ...

Your Doctor Does NOT Have A Cure For You

Modern medicine has no cure for diabetes and blood sugar imbalances. Sure they'll give you plen-

ty of expensive drugs that keep you alive longer. But the best doctors hope for is to control the disease through painful and dangerous daily insulin injections or by oral drugs which attempt to increase your cells' sensitivity to insulin.

Just ask any diabetic on insulin if he feels like his life is normal or their disease is cured. They will tell you that nothing could be further from the truth.

- ✓ They can't eat what they want
- ✓ They must continuously prick themselves and test their blood sugar level
- ✓ They must give themselves injections several times a day
- ✓ They must be prepared to deal with physical discomfort when the amount of insulin they inject is not quite right

If you are fortunate enough to not require insulin injections, you will be given medicines like Acarbose and Troglitazone to make your cells more receptive to the insulin your body produces. But possible side effects of these

Too Much or Too Little of A Good Thing Can Kill You

Why you need to help your body maintain the delicate balance between sugar and insulin

If you'd like proof of just what a remarkably balanced, precise and fine-tuned machine your body is, consider these facts about sugar and insulin:

You need sugar to live ... BUT too much sugar in your system will poison you to death. If excess sugar remains attached to your cell membranes for too long it is converted to sorbitol, a poison that damages cell membranes and causes nerve damage and other diseases. That's why ...

You need insulin to keep your sugar balanced ... BUT high blood levels of insulin cause obesity, heart attacks, high blood pressure and high cholesterol. That's why ...

YOU NEED ANTI-BETIC to regenerate pancreatic cells ... restore natural insulin production ... and safely balance blood sugar levels ... no buts about it.

drugs include

- ✓ indigestion
- ✓ cramps
- ✓ liver toxicity
- ✓ even death

All this, and you would still be extremely susceptible to heart attack, stroke, infection, kidney disease, mental decline, sexual problems and more.

Natural Sugar Destroyers Reverse Blood Sugar Imbalances and Prevent and Eliminate Disease

All would remain fairly hopeless for your hopes of maintaining balanced blood sugar levels until the ancient palm leaf bundle was discovered. The safe, natural ingredients in the ancient formula it revealed have been proven by modern scientific tests ... and by the extraordinary stories of real people ... to conquer blood sugar imbalances once and for all!

What this means is that now, with this safe, natural, proven and PATENTED formula, you can help your body better process sugar and possibly even, with your doctor's approval, be through with insulin or other drugs for good! This is not only possible ... it is a reality for many people all over the world. And the main reason is ...

Natural Indian Herb Normalizes Blood Sugar By Rejuvenating Damaged Pancreatic Cells

One of the key ingredients listed in the ancient palm leaf formula is a plant native to India called *Gymnema sylvestre*. Ancient writings and tradition show that

Gymnema has been used for thousands of years to re-balance blood sugar levels.

Dr. Ramadasan Kuttan, director of the Amala Research Center in Thrissur, India is widely regarded as the first to test and prove *Gymnema's* effectiveness. No stranger to ground-breaking medical discoveries, Dr. Kuttan is world-renowned for first isolating curcumin from turmeric and discovering its cancer-fighting abilities.

Dr. Kuttan conducted detailed animal testing of *Gymnema sylvestre* for one and one half years. The results proved conclusively that blood sugar levels were balanced and kidney and liver function was enhanced by *Gymnema*. But most extraordinarily, Dr. Kuttan was able to tell WHY *Gymnema* is so effective in normalizing blood sugar. *Gymnema* reverses damaged pancreatic cells and regenerates new ones.

Dr. Kuttan concluded *Gymnema* had shown "a remarkable ability to rejuvenate the pancreatic beta cells in laboratory rodents. It is the first [formula] to show such results."

Next, Dr. Kuttan conducted human studies which confirmed the *Gymnema's* exciting sugar-busting powers. Nine people with severe diabetes were given *Gymnema* for six months. At the end of the six months, the blood sugar of all nine was completely normal.

Another study published in the *Journal of Ethnopharmacology* proved that *Gymnema* actually does regenerate and repair the pan-

The Anti-Betic Formula Can Change Your Life Like It Has Theirs!

Completely Off Insulin

Krishnakumar Moorthy was having to inject himself with 20 units of insulin every day to control his blood sugar. Then he discovered the patented formula in **Anti-Betic**. Now he's completely off insulin and says that without this natural miracle formula he would be "certainly on insulin -- and probably crippled."

Slashed Her Blood Sugar Level In Half

Meera Naik was put on prescription drugs and a strict diet and exercise program by her doctor when her blood sugar level shot up to 440mg. Despite her efforts, her sugar would not go down and she found the classic symptoms of diabetes setting in. Within one month of discovering the **Anti-Betic** formula on the recommendation of a friend, her sugar level dropped to 200mg. Most importantly, she says "I am feeling much better now. More energetic and no more body aches."

creatic cells responsible for producing insulin.

Perfectly Safe and Stops Your Sugar Cravings

In another test, researchers found that *Gymnema* is very selective in its actions. This means people with normal pancreatic function need not fear an increase in blood sugar when taking *Gymnema*. It is the perfect preven-

“[Gymnema] has shown a remarkable ability to rejuvenate the pancreatic beta cells ... it is the first [formula] to show such results.”

-- Ramadasan Kuttan, MD,

effective treatment because works effectively, but only when it is needed to repair damaged cells.

Since the formula's discovery, *Gymnema* has been the subject of dozens of medical studies. All of them prove that *Gymnema sylvestre* works to balance blood sugar in two incredible ways. In addition to rejuvenating the vital pancreatic cells, it also works to reduce your taste and craving for sugar, thereby reducing your intake of sugar.

New clinical trials continue to show that *Gymnema sylvestre* is effective in treating diabetes and other blood sugar disorders. Most importantly, it is proven to be safe not only through modern studies, but by more than 2,000 years of use.

Substantial Relief With No Side Effects

Another critical ingredient in the ancient blood sugar formula is the Indian herb *Pterocarpus marsupium*. *Pterocarpus marsupium* contains ample amounts of a special nutrient called epicatechin.

Studies of diabetes-induced rats, show that after only five days of treatment with *Pterocarpus marsupium*, blood sugar levels were back to normal and the diabetes was reversed. When the pancreas of each rat was examined, all showed regeneration of the insulin-producing islet cells.

In one human study, *Pterocarpus marsupium* was given to 97 people newly diagnosed with blood sugar imbalances. After only 12 weeks of taking *Pterocarpus marsupium* 67 of those in the study had regained normal blood sugar levels and experienced “substantial relief” with no reported side effects.

Blood Sugar Reduced Naturally In Diabetics

The unripe fruit and seeds of *Momordica charantia* have been used for thousands of years in Indian and Chinese medicine to treat blood sugar problems. Because of this popularity, it has been the subject of over one hundred scientific studies and articles.

For example, in one study, 9 diabetic patients living in the United Kingdom were given *Momordica charantia*. This resulted in significant improvement in glucose tolerance without increasing the insulin levels in the blood.

One significant animal study by Akhtar, Athar and Yaqub of the University of Agriculture in Pakistan proved that *Momordica charantia* causes a decrease in blood sugar in both diabetic and normal rabbits with elevated blood sugar.

In another study, 8 diabetic patients experienced improvement in both glucose tolerance and blood glucose levels after just 7 weeks of taking *Momordica charantia* daily. A significant reduction in blood sugar values was also found in another study of 20 diabetic patients. And the list of proof for *Momordica charantia* goes on and on.

Significantly Reduce Blood Sugar And Cholesterol

Another plant known for years to help normalize blood sugar is the *Trigonella foenumgraecum* or fenugreek seed.

One particular human study conducted by the Endocrine and Diabetic Clinic in Israel, conclu-

misc photo

misc photo

sively confirmed the results of previous animal tests. When researchers gave fenugreek seed to 21 diabetics, blood sugar levels were significantly lowered.

In addition, fenugreek seed has been proven to significantly reduce cholesterol, thereby further reducing your risk of death.

Additional studies prove the effectiveness of *Cinnamomum tamala* as an aid to digestion and absorption of glucose; *Syzygium cumini* which stimulates the islets of the pancreas to regulate insulin secretion; and *Azadirachta indica* which regulates blood sugar levels.

**Ancient Formula
Now Available.
So Powerful, It's Patented!**

The renowned nutraceutical company Gero Vita has combined all of these powerful ancient sugar-busters to form the only patented natural treatment for diabetes and blood sugar imbalances. It's called **Anti-betic**, and as you can tell by the scientific studies, it can change your life.

Specifically for the US Patent Office, the combined formula was scientifically tested on 30 diabetic patients. Each took one tablet 3 times a day before meals. After only 4 to 6 months, the diabetic conditions of all the subjects significantly improved, and became at least partially reversed. By 12 months, all of the patients' blood sugar levels had become completely normal. As summed up in the official U.S. Patent document,

"...it is evident that the medicinal composition of the [formula] and the treatment of the human subjects with it has exhibited a remarkably beneficial effect. In some cases the subjects appear to be totally cured, while in other cases the improvement is dramatic, if not yet total."

Whether you have mildly elevated blood sugar, full blown diabetes ... or even if you are one of the millions who don't know ... **Anti-betic's** patented blend of natural herbs and roots is proven to normalize blood sugar levels naturally and safely.

**You Can Be Healed Within
Twelve Months**

Since the unique combination of natural herbs and plants in **Anti-betic** is proven to be so effective at regenerating pancreatic cells, your body will soon be producing all the insulin you need. With normal function of your pancreas restored, we expect that you may even be able to stop taking **Anti-betic** for reducing blood sugar within 12 months. That sure beats a life-time of insulin shots and drugs.

Of course, you'll still want to

use it to help keep your pancreas functioning normally and help maintain your new, healthy normal blood sugar. You'll feel so much better, you'll hardly believe it. And your risk of death will be slashed.

**Get Natural Healing and
Prevention Without Risk
Direct From Manufacturer**

Gero Vita is the exclusive manufacturer and distributor of the patented **Anti-betic** formulation.

Send or call for your supply of **Anti-betic** today. Gero Vita stands behind **Anti-betic** with this 100% SATISFACTION, RISK-FREE GUARANTEE:

If you don't feel healthier and notice your health problems coming to an end, simply return the containers (even if empty) for a prompt and full refund. No questions asked. You risk nothing.

**There Is Only One Patented
Blood Sugar Formula**

Don't be fooled by impostors. You cannot get this patented ancient blood sugar formula anywhere else. Use the order form on page 10, or call Gero Vita directly Toll-Free at 800-547-4319 to order your NO RISK supply of **Anti-betic** right now.

SATISFACTION GUARANTEED

If you are not pleased with Anti-betic for any reason, you may return the container within 30 days -- even if it's empty -- for a full refund with no questions asked.

Anti-Betic No-Risk Order Form

YES! I want to live longer! I want to live healthier! I want to have my blood sugar in balance to help prevent or eliminate diabetes, strokes, heart disease, depression, fatigue and other health problems. Please rush me the following supply of 100% natural **Anti-Betic**.
